CERTIFICATES

Full Stack Development - Java Plus From Seed Infotech, Pune (11/2022 - 11/2023)

Advanced Excel Course From Apna Academy, Jabalpur (M.P.) (08/2021 - 11/2021)

PROJECTS

Online BookStore Management System (01/2024 - 02/2024)

In this project, I will develop an Online Bookstore Management System using Java Servlets and JDBC, which allows users to create, read (search), update, and delete books in a MySQL database. The system will feature a user-friendly web interface, complete with proper error handling and validation to ensure secure and sanitized user input for database operations. As a bonus, I may include user authentication and authorization to restrict access to authorized users only, and the code will follow best practices, ensuring security against common vulnerabilities.

Employee Management System (02/2024 - 03/2024)

Employee Management System is a powerful web application developed with Angular frontend and Spring Boot backend, enabling seamless CRUD operations for efficient management of employee data. In this project Rest Api will used for build communication between frontend and backend. And for data persistency data stored in permanently stored in database using MYSQL.
