Python Developer with 3 years of experience in designing, implementing, and maintaining scalable infrastructure solutions. Proficient in leveraging automation tools, cloud technologies, and best practices to streamline development, deployment, and operations processes. Adept at collaborating with cross-functional teams to drive continuous improvement and deliver high-quality, reliable software solutions.

WORK EXPERIENCE

DevOps Engineer II / Python Developer

Amazon

09/2022 - 04/2024

ironmountainWebsite & CloudWatch log fetcher tool

Responsibilities

- Optimized codebase through bug fixes, performance enhancements, and security improvements for migration tasks while implementing new features and leveraging hands-on Linux experience along with Kubernetes and Docker.
- Designing (high level architecture), Implementing new features based on requirements, creating the workflow, utilizing AWS services and internal tools and ReactJS for the Ironmountain website (Legacy Service) by World Wide advertising Services (Amazon) for the advertiser to host their advertisement.
- Cloud Development and automation using Python (boto3), AWS Lambda, Amazon S3, DynamoDB, AWS CDK (Cloud Development Kit), Load Balancer, Kubernetes and AWS SAM (Serverless Application Model) to create the infrastructure of the service using Docker & Kubernetes. Also created lambdas to automate business critical task using AWS services.
- Developed & deployed serverless apps with AWS CDK (Cloud Development Kit) to define and provision cloud infrastructure, enhancing deployment speed and maintainability, AWS Lambda with API Gateway & RESTful APIs to automate process, improved efficiency by 98%.
- Created a full stack tool Cloudwatch log Fetcher tool to fetch the logs and based on use-cases filtering it so that the support engineers can use it to provide manual support to the advertiser for issues related to ironmountain website.

Software Engineer

Tata Consultancy Services

07/2021 - 09/2022

Responsibilities

- Utilized OOPS with Python, MySQL and ReactJS to implement new features for the internal website to improve user satisfaction by 90%.
- Developed and optimized stored procedures in MySQL to implement Slowly Changing Dimension (SCD) Type 2 for master data management.
- Developed new features for the websites as per the business model decided by leadership & implementing those using React JS and Backend using Python Flask
- Built and maintained RESTful APIs using Flask and FastAPI, implementing features like user authentication, data validation, asynchronous processing.

PERSONAL PROJECTS

Data Fetcher - FullStack Project

- An AI-powered application that allows users to interact with events, company, and people data to - Identify companies that are attending certain types of events. Find event over a given period, or events in a certain industry; Finding, etc.

EDUCATION

B.Tech (Information Technology)

Jabalpur Engineering College, Jabalpur (M.P.)

07/2017 - 07/2021

7.87 C.G.P.A

TECHNICAL SKILLS

Python SQL Git Version Control
Jira AWS CI/CD React JS
Flask Django Restful API EKS
Fast API Full Stack Web Development
Docker HTML5 CSS
Bootstrap Javascript
MongoDB (NoSQL) Linux

DOMAINS OF KNOWLEDGE

Data Structures & Algorithm

data structures, algorithm design, problem solving, and complexity analysis

Database Management System

Amazon Web Services (AWS)

CERTIFICATIONS

DevOps Engineering on AWS (Amazon)
(01/2024 - 02/2024)

AWS Technical Essentials
(10/2022 - 10/2022)

Developing On AWS (Amazon)
(01/2024 - 02/2024)

Python 3 Programming Specialization,
Coursera

Python Basics Python Functions, Files, and Dictionaries,
Data Collection and Processing with Python, Classes and
Inheritance, OOPS

VOLUNTEER EXPERIENCE

Taught the students of Angandwadi in Jabalpur.
Angandwadi (Centre no. 18)

Coordinator in Physics Workshop, Jabalpur.
Jabalpur Engineering College

INTERESTS

Sketching Football Badminton
